

CONTROLS

What does Controls do?

In Formula Student, teamwork and organization are just as important as engineering. The Management & Marketing division ensures that everything runs smoothly behind the scenes, from coordinating projects and resources to representing the team to the outside world.

In this area, you'll take responsibility for internal and external events, develop and implement operational strategies, and support the team's growth and visibility through professional communication and marketing.

If you enjoy organizing, planning and communicating with people from different backgrounds, whether within the team, with industry partners, or at public events, this is the place for you!

Your Tasks:

- Model vehicle dynamics
- Torque vectoring
- Integrate and fuse sensors
- Simulate systems in MATLAB/Simulink
- Design traction control systems
- Implement vehicle dynamics control

Requirements:

- Preferably studying xxx or a related field
- Confident in using xxx
- Interest in xxx
- Very good English communication skills
- Strong teamwork and collaboration abilities
- Independent, structured, and reliable working style
- Commitment and enthusiasm for the project
