

POWERTRAIN

What does Powertrain do?

In Formula Student, teamwork and organization are just as important as engineering. The Management & Marketing division ensures that everything runs smoothly behind the scenes, from coordinating projects and resources to representing the team to the outside world.

In this area, you'll take responsibility for internal and external events, develop and implement operational strategies, and support the team's growth and visibility through professional communication and marketing.

If you enjoy organizing, planning and communicating with people from different backgrounds, whether within the team, with industry partners, or at public events, this is the place for you!

Your Tasks:

- Design and manufacture the motor
- Develop the gearbox
- Cooling Simulation and Thermal Management
- Set up testbench and run performance tests

Requirements:

- Interest in mechanics
- Very good English communication skills
- Strong teamwork and collaboration abilities
- Independent, structured, and reliable working style
- Commitment and enthusiasm for the project
